

RUBRICS EVALUATION

Performance Criteria	Scale 1 (0-25%)	Scale 2 (26-50%)	Scale 3 (51-75%)	Scale 4 (76-100%)	Score (Numerical)
Understandability Ability to analyse Problem and Identify solution	Unable to understand the problem.	Able to understand the problem partially and unable to identify the solution	Able to understand the problem completely but unable to identify the solution	Able to understand the problem completely and able to provide alternative solution too.	
Logic Ability to specify Conditions & control flow that are appropriate for the problem domain.	Queries logic are incorrect	Queries logic are on the right track but has several errors	Queries logic are mostly correct, but may contain an occasional boundary error or redundant or contradictory condition.	Queries logic are correct, with no known boundary errors, and no redundant or contradictory conditions.	
Debugging Ability to execute /debug	Unable to execute Queries	Unable to debug several errors.	Able to execute Queries with several warnings.	Able to execute Queries completely	
Correctness Ability to code formulae and algorithms that reliably produce correct answers or appropriate results.	Queries do not produce correct answers or appropriate results for most inputs.	Queries approach correct answers or appropriate results for most inputs, but can contain miscalculations in some cases.	Queries produce correct answers or appropriate results for most inputs.	Queries produce correct answers or appropriate results for all inputs tested.	
Completeness Ability to demonstrate and deliver on time.	Unable to explain Queries and the Queries were overdue.	Unable to explain the Queries and the Queries submission was late.	Able to explain Queries and the Queries were delivered within the due date.	Able to explain Queries and the Queries were delivered on time.
