EXPERIMENT NO.8

Aim- **To perform Queries for creating the users and assigning their roles.**

Query 1: Create a user data_owner1 identified by password "super";

Solution-

create user data_owner1 identified by "super";

Output-

```
User created.
```

Query 2: Login to user data_owner1 and create a table employee with two attributes id and name.

Solution-

create table employee (id number, name char(40));

Output-

```
Table created.
```

Query 3: Revoke the rights create table from user data_owner1 and then create a table employee1 with two attributes id and name.

Solution-

revoke create table from data_owner1;

Output-

```
Table created.
```

Solution-

create table employee1(id number, name char(40));

Output-

```
ORA-01031: insufficient privileges
```

Query 4: Now again give create table rights to user data_owner1 and then create a table employee1 with two attributes id and name.

Solution-

grant create table to data_owner1;

Output-

```
Table created.
```

Solution-

create table employee1(id number, name char(40));

Output-

```
Table created.
```
